ABOUT ME

I am a Systems Engineering with a strong passion for UX/UI design and the creation of user-centered digital experiences. I am currently developing my career as a UX/UI Designer, combining technical knowledge with visual design, usability principles, and user empathy.

Although I have limited professional projects so far, I stand out for my high motivation, fast learning ability, and strong commitment. I am eager to grow within collaborative teams where I can continue learning, contribute creatively, and transform ideas into functional, intuitive, and visually engaging digital solutions.

ACHIEVEMENTS

DataForce – Audio Classification AI TRAINER (2025)

Worked as a freelancer on an international project focused on **audio** evaluation and annotation for AI training.
→ Skills: audio analysis, data labeling, attention to detail.

Error Reduction in Data Annotation – AI TRAINER

Achieved a precision rate above 95% in audio classification, reducing inconsistencies and improving the reliability of deliverables.
→ Skills: quality control, data consistency, independent work..

On-Time Project Delivery

Successfully met tight deadlines in data entry and transcription projects while maintaining the quality standards required by the platform and company.
→ Skills: time management, productivity, professional responsibility.

SOFT SKILLS

Strategic Problem Solving

Ability to structure complex challenges, identify patterns, analyze data, and design practical solutions. Experienced in applying logical and technical thinking across diverse contexts.

Leadership and Teamwork

Effective coordination of multidisciplinary teams in demanding academic environments. Skilled in decision-making, delegating responsibilities, and achieving shared goals under pressure.

Personal Impact and High-Performance Mindset

Disciplined background that reflects consistency, continuous improvement, and resilience. Strong results-driven mindset and commitment to excellence in every task undertaken.

Multicultural Communication and User Empathy

Bilingual (Spanish, English – C1) with direct experience interacting with users to understand their needs, communicate technical proposals, and build user-centered solutions.

STRONG SKILLS

- **Frontend:** HTML, CSS, JavaScript
- **Backend:** Java (POO, estructuras de datos), Node.js (en aprendizaje), Go (en aprendizaje)
- **Lenguajes de Programación:** JavaScript, Node, TypeScript, PSeInt
- **Bases de Datos y Herramientas:** MySQL, SQL, Oracle, Excel, POWER BI
- **Herramientas de Diseño:** Adobe Photoshop, Illustrator, XD, InDesign, Figma, Wix, Wordpress
- Fast and accurate typing
- Audio quality analysis (noise, clarity, intonation)
- Transcription and data labeling
- Organization and management of simple databases
- Attention to detail

EDUCATION

B.S. in Systems Engineering – 6th semester (2023 – Present)
(Bachelors)

Konrad Lorenz University Foundation – Bogotá, Colombia

Technologist in Audiovisual Graphic Media (2023 – 2024)
(Associate)

SENA – National Learning Service – Bogotá, Colombia

(Associate)

Primary and High School Diploma (2021)

Colegio Nuestra Señora del Pilar Chapinero – Bogotá, Colombia

Volunteer Emergency Prevention Leader

PAREC Institute – Bogotá, Colombia

LANGUAGES

- **Spanish** Native
- **English** [Proficient C1](#)
- **Korean** Basic A2

TECHNICAL [CERTIFICATIONS](#) & RELEVANT COURSES

Privacy of Datas - DOD Mandatory Controlled Unclassified Information (CUI) Training | **Defense Counterintelligence and Security Agency EE.UU**

Design & Digital Tools – Adobe Photoshop, Illustrator, InDesign, XD | **SENA**

UX/UI Design – Figma, WiX, HTML/CSS | **Great Learning (2024)**

Programming Languages – JavaScript, React, Node, TypeScript

Programming Fundamentals – PSeInt | **EKG Corporation (Argentina)**

Databases & Tools – MySQL, SQL, Excel | **SENA**

Languages – English (C1 – EFSET 2024) | **SENA**

Languages – French (A1 – Basic) | **SENA**

Languages – Korean (A2 – Elementary) | **Oriental Languages Academy**

WORK EXPERIENCE

AI Data Annotator (LLM & Speech)

DataForce | TransPerfect – Cardamom Project (Spanish)

2025

- Annotated and analyzed Latin American Spanish audio recordings, evaluating voice characteristics, speech delivery, tone, pacing, rhythm, pauses, and emotional cues.
- Classified samples detecting background noise, speaker overlap, low volume, microphone distance, and technical interference.
- Worked independently in a remote environment, meeting productivity and quality metrics.

Quality Assurance (QA) Reviewer & Data Annotator

DataForce | TransPerfect

December 2025

- Reviewed and validated **100+ audio annotation tasks per day** (short clips, similar to ~5 seconds).
- Verified transcription accuracy, compliance with formatting guidelines (punctuation, capitalization, inline tags), and correctness of emotional/vocal labels.
- Detected errors such as: incorrect punctuation, missing pauses, misclassified background noise, speaker overlap, low volume.
- Provided **clear, actionable written feedback** to annotators using tracking sheets, documenting recurring issues and improvement suggestions.
- Contributed to raising the project's overall acceptance rate through rigorous quality control.

AI Trainer Audio Data Annotator– Audio Data Annotation

DataForce | TransPerfect

October -December 2025

- Compared paired Latin American Spanish audio recordings to identify differences in tone, pitch, articulation, pacing, pauses, and emotional expression.
- Embedded inline annotation tags within transcriptions to document speaker emotion, vocal intensity, pauses, emphasis, and speech patterns.
- Produced structured, high-accuracy transcriptions following detailed linguistic and formatting rubrics.

AI Trainer Data Input – Prompt Ai

T-Maxx

2026

- Reviewed and verified short audio transcriptions (approx. 5 seconds) for accuracy, punctuation, and adherence to style guides, approving or rejecting with clear written feedback.
- Identified and corrected errors in grammar, formatting, and speaker tagging, ensuring consistency with project-specific rubrics and quality metrics.
- Flagged recurring annotation issues to project leads and provided actionable feedback to annotators to improve overall dataset reliability.
- Maintained high throughput (100+ tasks/day) while meeting strict weekly productivity targets (10–20 hours/week) in a freelance remote environment.
