ABOUT ME

I am a Systems Engineering professional with hands-on experience in Artificial AI Trainer and LLM Response Evaluator with hands-on experience in side-by-side (SxS) model comparisons, preference ranking, rubric-based quality assessment, and evidence-based evaluation. Experienced in comparing AI-generated responses from ChatGPT, Gemini, Claude, and other models to assess factual accuracy, reasoning, instruction following, relevance, completeness, clarity, safety, and overall usefulness. Skilled in identifying hallucinations, subtle response-quality differences, and annotation inconsistencies while applying detailed project guidelines. Additional experience in multimodal AI evaluation, audio quality assessment, data annotation, and quality assurance.

ACHIEVEMENTS

LLM & Conversational AI Evaluation (2025 – 2026)

Evaluated general-knowledge, technical, coding, and multimodal responses from ChatGPT, Gemini, Claude, and other models. Performed side-by-side comparisons, preference ranking, and rubric scoring, with independent fact-checking against reliable sources when permitted.

→ *Skills: hallucination detection • fact-checking • instruction following • reasoning & safety review*

Multimodal AI: Robotics, Video, Image & Audio (2025 – 2026)

Annotated real robotic-arm footage from a New Jersey laboratory, egocentric video, human activity recognition, and vision-language model (VLM) tasks: object identification, action recognition, temporal event analysis, and image-text alignment. In audio: transcription and verification, speaker diarization, overlapping speech, multilingual and code-switching analysis, and audio quality.

AI Code Evaluation & Software Engineering

Assessed AI-generated code for correctness, syntax, logic, efficiency, readability, edge cases, and error handling, comparing outputs from different models. Backed by a Systems Engineering foundation and software projects using OOP, MVC architecture, and relational databases.

→ *Skills: Python • Java • JSON • SQL / MySQL • Git • Code review • Technical documentation*

SOFT SKILLS

Analytical Rigor & Attention to Detail

Ability to detect subtle errors, hallucinations, and inconsistencies in model outputs and to justify every judgment with clear, objective evidence.

Guideline Compliance & Consistency

Quick to learn complex rubrics and project-specific guidelines, applying them consistently across high-volume tasks while meeting quality metrics and deadlines.

Independent Remote Work & Reliability

Disciplined, self-managed, and results-driven in asynchronous, globally distributed teams, with a commitment to accuracy, confidentiality, and continuous improvement.

Multicultural & Multilingual Communication

Bilingual (Spanish native, English C1), with basic Korean (A2) and French (A1). Experience handling multilingual content in English, Spanish, Italian, and German, and writing clear, actionable feedback for international AI teams.

EDUCATION

B.S. in Systems Engineering – Completed (2023 – 2026)
(Bachelors)
Konrad Lorenz University Foundation – Bogotá, Colombia

Technologist in Audiovisual Graphic Media (2023 – 2024)
(Associate)
SENA – National Learning Service – Bogotá, Colombia

Primary and High School Diploma (2021)
Colegio Nuestra Señora del Pilar Chapinero – Bogotá, Colombia

Volunteer Emergency Prevention Leader
PAREC Institute – Bogotá, Colombia

LANGUAGES

- **Spanish** Native
- **English** Proficient C1- ADVANCE
- **Korean** Basic A2
- **French** Basic A1

TECHNICAL CERTIFICATIONS & RELEVANT COURSES

Data Privacy – DOD Mandatory Controlled Unclassified Information (CUI) Training | **Defense Counterintelligence and Security Agency (USA)**

AI – AI for Everyone | **Konrad Lorenz University Foundation**

Agile – Scrum

Databases – Construction with MySQL database , SQL, Databases: generalities and management systems | **SENA**

Programming Fundamentals – PSeInt | **EGG Corporation (Argentina)**

CISCO Networking – CCNA: Switching, Routing, and Wireless Essentials, CCNA: Introduction to Networks | **Cisco Networking Academy**

Design & Digital Tools – Adobe Photoshop, Illustrator, Digital image production, , Design Thinking | **SENA**

UX/UI Design – Figma, Wix, HTML/CSS | **Great Learning (2024)**

Office Tools – Excel | **SENA**

Languages – English (C1 – EF SET 2024) | **EF SET**

Languages – French (A1 – Basic) | **SENA**

Languages – Korean (A2 – Basic) | **Academia de Lenguas Orientales**

→ **View all certificates**

WORK EXPERIENCE

Robot Trainer – Robotics Video Annotation & Evaluation
MICRO 1 (Remote) | 2026 – Present

- Analyze real footage of robotic arms operating in a laboratory in New Jersey, United States, evaluating grasping attempts, object manipulation, robotic movements, collisions, task execution, and failures.
- Identify grasping and movement errors and document findings with precise timestamps, screenshots, task IDs, and structured annotation guidelines.
- Assess task completion, control and safety, physical plausibility, and cross-camera consistency, selecting the appropriate verdict with objective, evidence-based justifications.
- Maintain annotation accuracy and platform compliance across Horizon and Feather, ensuring consistent labeling and adherence to project quality standards.

AI Trainer – Audio Data Annotator (LLM & Speech)
DataForce by TransPerfect (Remote) – *Cardamom Project* | 2025

- Annotated and analyzed Latin American Spanish audio recordings for speech AI, evaluating voice characteristics, speech delivery, tone, pacing, rhythm, pauses, and emotional cues.
- Classified samples for audio quality, detecting background noise, overlapping speech, low volume, microphone distance, and technical interference.
- Worked independently in a remote environment, consistently meeting productivity and quality metrics.

Quality Assurance (QA) Reviewer & Data Annotator
DataForce by TransPerfect (Remote) | December 2025

- Reviewed and validated **100+ audio annotation tasks per day** (short clips of ~5 seconds) for AI training projects for the United States.
- Verified transcription accuracy, formatting compliance (punctuation, capitalization, inline tags), and correctness of emotional/vocal labels.
- Detected errors such as incorrect punctuation, missing pauses, misclassified background noise, overlapping speakers, and low volume.
- Provided clear, actionable written feedback to annotators through tracking sheets, documenting recurring issues and improvement suggestions.

AI Trainer – LLM Response Evaluation & Audio Quality Verifier
T-Maxx (Remote) | 2026

- Interpreted user intent in prompts and evaluated whether conversational AI responses fully met user needs.
- Compared, ranked, and labeled model responses using side-by-side and rubric-based assessments for accuracy, relevance, completeness, clarity, and safety.
- Flagged hallucinations and factual errors, verifying information against reliable sources when permitted.
- Reviewed and quality-checked annotated outputs to ensure consistency and accuracy, working independently and asynchronously to meet deadlines.

AI Trainer – AI Code Response Evaluator
Alignerr (Remote) | 2026

- Assessed whether AI-generated code correctly addressed the user's programming request and followed the specified instructions.
- Reviewed code correctness, syntax, logical consistency, efficiency, readability, and error handling; checked that the model chose appropriate approaches, used functions and variables correctly, handled edge cases, and explained its solution clearly.
- Ran side-by-side evaluations of code generated by different AI models (e.g., ChatGPT, Gemini, Claude) to select the most accurate, complete, and maintainable solution.
- Verified code behavior through testing or technical documentation when permitted; documented errors, assigned scores, and wrote evidence-based justifications.

AI Trainer – Video Annotation & AI Response Quality Verifier
Crossing Hurdles (Remote) | 2026

- Annotated video content for temporal event analysis and action recognition, identifying events and assigning precise timestamps.
- Created structured video descriptions at multiple levels of detail (A, B, and C formats).
- Evaluated and verified AI-generated video annotations for accuracy, consistency, and guideline compliance.
- Contributed to training datasets for computer vision and multimodal AI models.

Medical & Multilingual Data Entry Specialist
The Language Doctors | 2026

- Processed and validated multilingual documentation in English, Spanish, Italian, and German.
- Converted scanned medical records into editable Word and Excel documents and maintained patient and appointment data in CRM and database systems.
- Performed quality control reviews to ensure accuracy, consistency, and completeness of records.
- Maintained strict confidentiality and compliance when handling sensitive information.

Data Entry Assistant & Business Research Specialist
Global Advance (Remote) | 2026

- Researched company information using international public registries and online sources.
- Entered, organized, and validated business data within internal databases, performing quality checks for accuracy and completeness.
- Followed standardized procedures while meeting productivity and reporting requirements in a remote environment.
