

ISABELLA CASTRO CAMACHO

AI Product & UX/UI Designer · LLM/LMM Evaluator · Systems Engineer

PROFESSIONAL SUMMARY

AI Product and UX/UI professional with a Systems Engineering background and hands-on experience across user-centered product design, frontend implementation, and LLM/LMM evaluation. Experienced in designing digital experiences from user flows and wireframes to high-fidelity interfaces and reusable components, while also evaluating AI-generated outputs across text, code, audio, video, and robotic rollouts. Combines product thinking, technical understanding, multimodal QA, and evidence-based evaluation to design and assess reliable, intuitive AI-powered digital experiences.

SELECTED PRODUCT CASE STUDIES

Colombia Canta y Encanta — Festival Web/App Experience

- **Problem:** Create a clear festival journey for discovering events, understanding participation, registering, and managing user activity.
- **Process & decisions:** Defined navigation and end-to-end user flows; translated them into wireframes and grayscale mockups; structured decision points for sign-in, registration, casting, events, and profile.
- **My contribution:** UX flow, information architecture, wireframes, interface structure, responsive UI thinking, and design-to-development consistency.
- **Solution / evidence:** Connected experience across Home, authentication, event registration, casting submission, profile, courses, favorites, and casting status.

CampusGo — Campus Marketplace, Social Map & Safety Platform

- **Problem:** Student commerce and campus interactions are fragmented across informal channels, making discovery, organization, and safety harder.
- **Process & decisions:** Structured the concept around Marketplace, a gamified social map, and campus safety so each major user need has a clear path within one ecosystem.
- **My contribution:** Product concept, UX structure, visual direction, module definition, interface design, and technical feasibility thinking.
- **Solution / evidence:** Unified product concept connecting student commerce, location-based interaction, and safety features.

USS Sello Editorial — E-commerce Platform

- **Problem:** Translate research requirements into a usable e-commerce experience while keeping design and development aligned across a remote Colombia-Peru collaboration.
- **Process & decisions:** Compiled and cleaned requirements, produced SRS documentation, completed the Figma design, performed QA during implementation, and coordinated progress using Scrum.
- **My contribution:** UX/UI design, requirements analysis, design-development handoff, QA, and technical collaboration.
- **Solution / evidence:** E-commerce work spanning Figma and implementation with HTML, CSS, Node.js, Railway, and Neon.

EXPERTISE

Product & UX

- User flows & information architecture
- Wireframing & prototyping
- High-fidelity UI
- Responsive design
- Design systems
- Accessibility

AI & Evaluation

- LLM/LMM evaluation
- Multimodal evaluation
- AI response evaluation
- Rubric-based QA
- Evidence-based evaluation

Technical

- Figma
- HTML/CSS
- JavaScript/TypeScript
- React
- JSON
- Python
- SQL

LANGUAGES

- Spanish — Native
- English — C1 (EF SET 2024)
- Korean — A2

EDUCATION

B.S. in Systems Engineering

- Konrad Lorenz University Foundation, Bogotá · 2026

Technologist in Audiovisual Graphic Media

- SENA, Bogotá · 2023–2024

TOOLS & PLATFORMS

- Figma · Adobe XD
- Photoshop · Illustrator · InDesign
- Node.js · Railway · Neon
- MySQL · Oracle · GitHub
- Horizon · Feather
- Annotation & evaluation platforms

SOFT SKILLS

- Product thinking
- Evidence-based decision making
- Attention to detail
- Cross-functional collaboration
- Clear documentation & feedback
- Remote teamwork (Scrum)

PROFESSIONAL EXPERIENCE

UX/UI Designer & Research Assistant — Delfin Program (USS Sello Editorial)

Señor de Sipán University (Peru) | Remote from Colombia | 2026

- Led the UX/UI design of an editorial e-commerce platform in Figma — user flows, wireframes, responsive high-fidelity screens and reusable components.
- Compiled and systematized user datasets and requirements; produced the technical SRS documentation that guided the product scope.
- Owned the design-to-development handoff and performed QA during implementation (HTML, CSS, Node.js, Railway, Neon); coordinated a remote Colombia–Peru team using Scrum.

AI Trainer — Video Robot Evaluation

Micro1 | Remote | 2026

- Evaluate paired AI-generated robot video rollouts against task completion, safety/control, physical plausibility, visual quality, and cross-camera consistency; select verdicts with evidence-based justifications across Horizon and Feather.

AI Trainer — Code & AI Response Quality Verifier

Alignerr | Remote | 2026

- Evaluated and compared AI-generated coding/software-engineering responses for accuracy, instruction adherence, reasoning quality, confidence, and clarity using evidence-based frameworks.

Quality Assurance Reviewer & Data Annotator

DataForce by TransPerfect | Remote | 2025

- Reviewed and validated 100+ annotation tasks per day, maintaining 95%+ classification accuracy and providing clear, actionable feedback on recurring issues.

Additional AI Evaluation Experience

- **Crossing Hurdles** (video annotation & AI output verification) · **T-Maxx** (AI response comparison & audio QA) · **DataForce — Cardamom Project** (Latin American Spanish speech annotation) | Remote | 2025–2026

AI + PRODUCT CAPABILITIES

AI Interaction Quality

Evaluating whether model outputs satisfy user intent, instructions, accuracy, and clarity.

Product Design

User flows, information architecture, prototyping, responsive UI, design systems, and accessibility.

Multimodal UX Quality

Evaluating visual, audio, video, and cross-camera consistency in multimodal outputs.

Technical Collaboration

Frontend understanding, requirements/SRS, QA, design-development handoff, and structured data.
